

CERTIFICATE OF CONFORMITY

CONEKT RAILS

Echelle Européenne certifies that Conekt Rail lifelines comply with the requirements of EN 795 : 2012 type D and Technical Specification TS 16415:2013.

Based on the preliminary tests performed by us, the evaluations conducted by QUINTIN CERTIFICATIONS in April 2023, and further testing carried out in May and June 2023, we are able to verify complete regulatory compliance of all the components of these lifelines.

The components concerned are the following: R03, R06, R03XL, R06XL, R10, R13, R20, R20XL, R21, R21XL, R22, R25XL, R50, R52 and R53.

However, these components must be installed in accordance with the installation instructions supplied by Echelle Européenne.

These lifelines can be installed on standard interfaces or on interfaces specifically designed by a competent person.
