CONEKT X-CONE

FALL ARREST SYSTEM FOR STATIC LIFELINES

L'ECHELLE
EUROPEENNE

L'ECHELLE EUROPEENNE EXCLUSIVE

DESCRIPTION

The X-CONE can be used to secure slopes over 15° and up to 40°.

TECHNICAL FEATURES

- Material: aluminium
- Diameter: 50 mm

Reference	Definition
A0015003	CONEKT X-CONE Fall arrest system for static lifelines

Material	Aluminium
Diameter	50 mm
Screws	4 5/12 hex socket cap screws

ASSEMBLY PROCEDURE

X-CONEs are used for configurations where the slope is greater than 15°.

They are attached to the lifeline cable by means of 4 M5 hex socket cap screws fastened through the stop.

The tip of the cone should face down the slope.

Place an X-CONE every metre for slopes between 15 and 30° and every 50 cm for slopes between 30 and 40°.
