| <b>Material</b> | Aluminium                    |
| <b>Diameter</b> | 50 mm                        |
| <b>Screws</b>   | 4 5/12 hex socket cap screws |

## ASSEMBLY PROCEDURE

X-CONES are used for configurations where the slope is greater than 15°.

They are attached to the lifeline cable by means of 4 M5 hex socket cap screws fastened through the stop.

The tip of the cone should face down the slope.

Place an X-CONE every metre for slopes between 15 and 30° and every 50 cm for slopes between 30 and 40°.
